

Today there are over 1500 health insurance companies and third party administrators in the United States. Each of the organizations often has several plans with widely differing benefit structures and provider requirements. As a convenience, we will bill your insurance carrier for you when you provide appropriate membership documentation.

We are preferred providers for most health insurance companies. However, because of the large number of insurance companies and wide variation between plans, we cannot guarantee that we are a preferred provider for your particular health plan. Likewise, we cannot guarantee that a particular treatment is a covered benefit under your plan.

If you are unsure whether we are a preferred provider for your health plan or whether a treatment is covered by your health plan, please use our reception desk phone to call your plan for verification. The number should be on the back of your membership card.
